Version B

1a Translating number words into numerals – Version A

9                    5                    1                    4  
                      8                    0                     
2                    7                    3                    6

1a Translating of number words into numerals - Version B

8                    6                    0                    7  
                      3                    4                    2  
                      1                    9                    5

1b Translating number words into numerals – Version A

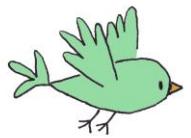

9                    5                    1                    4  
                      8                    0                     
2                    7                    3                    6

1b Translating number words into numerals – Version B

8                    6                    0                    7  
                      3                    4                    2  
                      1                    9                    5

1c Translating number words into numerals – Version A

9                    5                    1                    4  
                      8                    0                     
2                    7                    3                    6

1c Translating number words into numerals – Version B

8                    6                    0                    7  
                      1                    2                     
3                    4                    9                    5

1d Translating number words into numerals – Version A

9                    5                    1                    4  
2                    8                    0                    6  
7                    3

1d Translating of number words into numerals – Version B

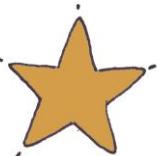

8                    6                    0                    7  
3                    4                    1                    2  
9                    5

2 Perceptual subitizing – Version A

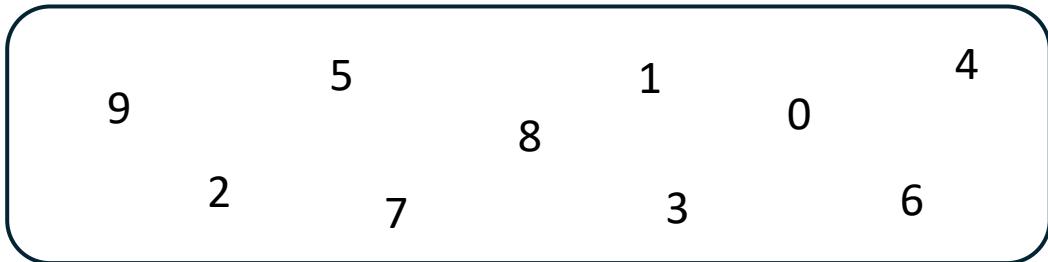

9	5	1	4
2	8	0	6
7	3		

2 Perceptual subitizing – Version B

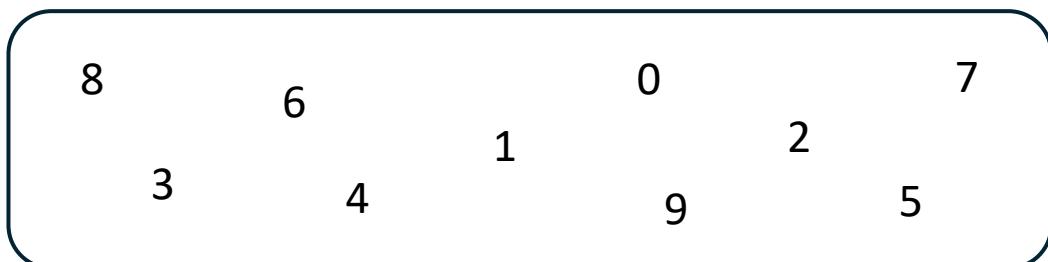

8	6	0	7
3	4	1	2
		9	5

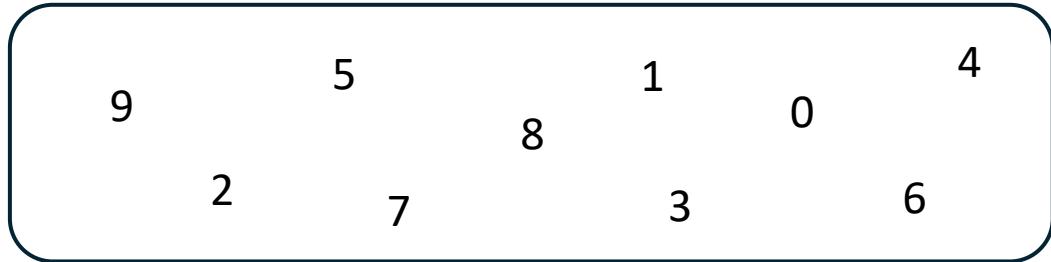

3 Conceptual subitizing – Version A

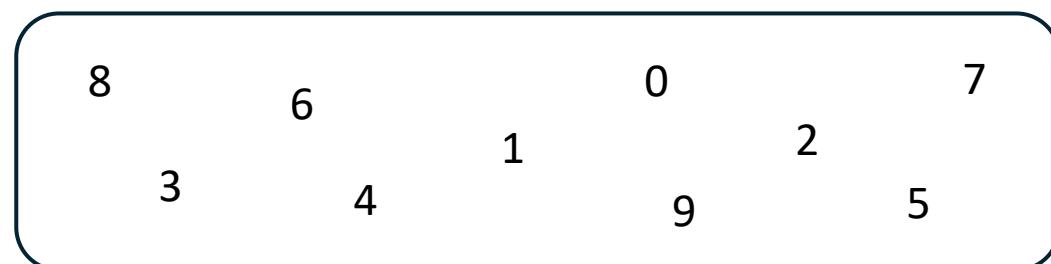

3 Conceptual subitizing – Version B

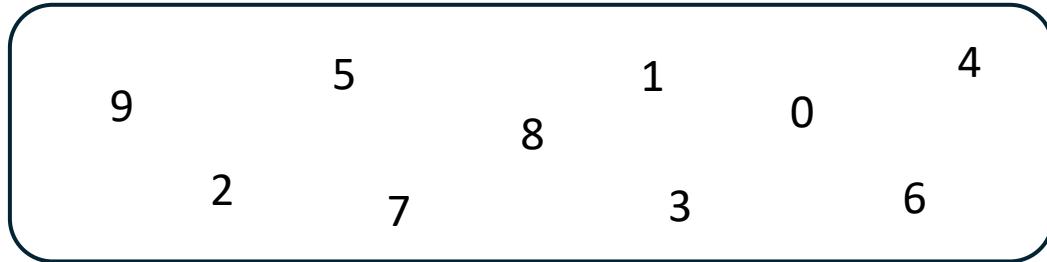

4 Emerging part-whole understanding – Version A

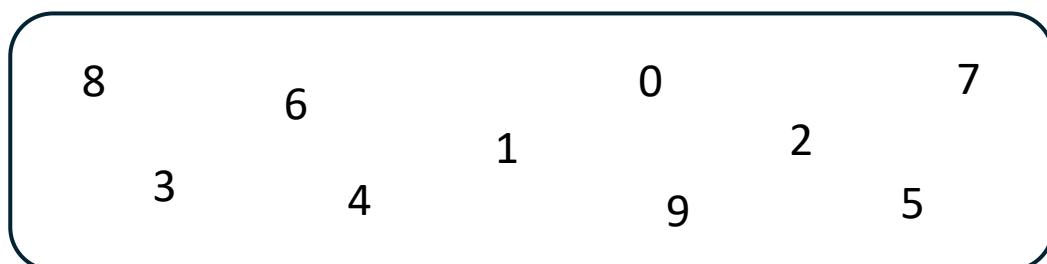

4 Emerging part-whole understanding – Version B

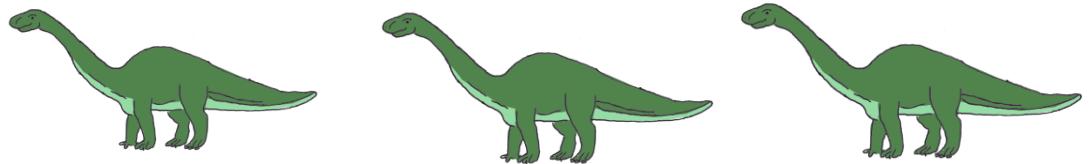

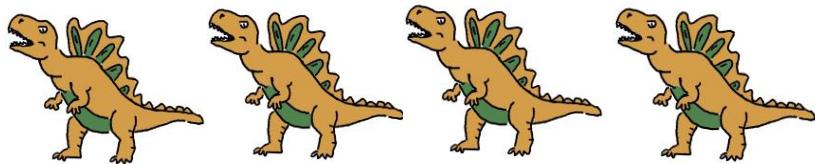

4 Emerging part-whole understanding – Version A

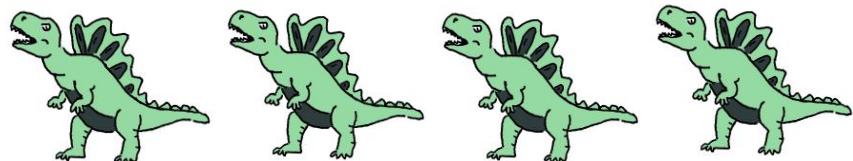

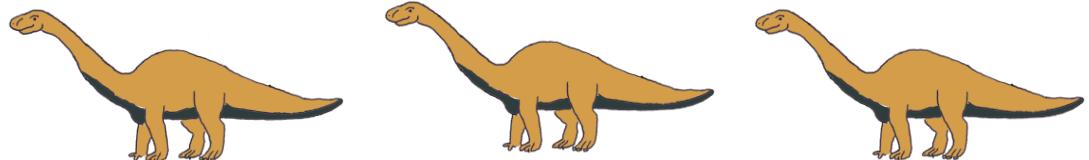

4 Emerging part-whole understanding – Version B

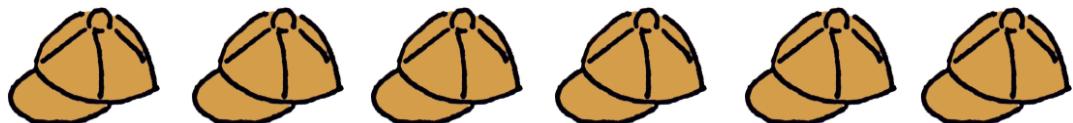

5a Comparing sets – Version A

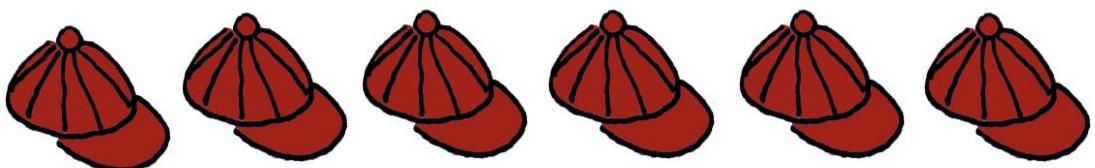

5a Comparing sets – Version B

5b Comparing sets - Version A

5b Comparing sets – Version B

6a Ordinal understanding (number after) – Version A

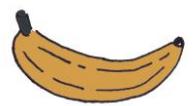

9	5	1	4
2	8	0	6
7	3		

6a Ordinal understanding (number after) – Version B

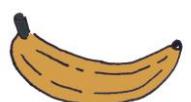

8	6	0	7
3	4	1	2
		9	5

6b Ordinal understanding (number after) – Version A

9	5	1	4
2	8	0	6
7	3		

6b Ordinal understanding (number after) – Version B

8	6	0	7
3	4	1	2
		9	5

6c Ordinal understanding (number after) – Version A

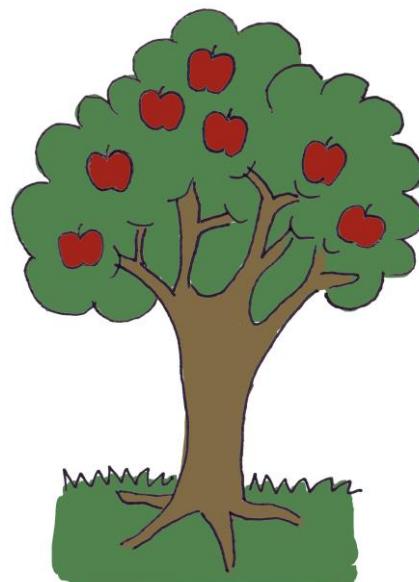

9	5	1	4
2	8	0	6
7	3		

6c Ordinal understanding (number after) – Version B

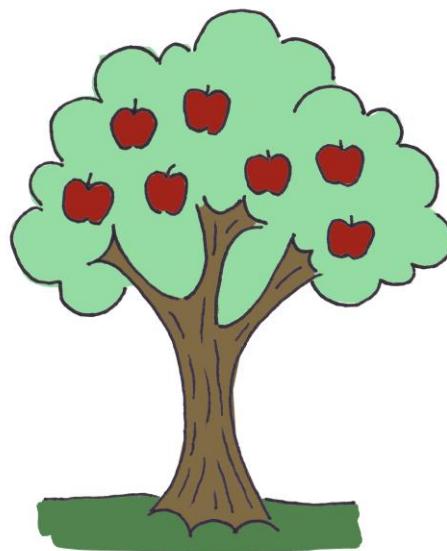

8	6	0	7
3	4	1	2
		9	5

7 Counting – Version A

9	5	1	4
2	8	0	6
7	3		

7 Counting – Version B

8	6	0	7
3	4	1	2
		9	5

8a Ordinal understanding (number before)

9	5	1	4
2	8	0	6
7	3		

8a Ordinal understanding (number before)

8	6	0	7
3	4	1	2
		9	5

8b Ordinal understanding (number before)

9                    5                    1                    4  
2                    8                    0                    6  
7                    3

8b Ordinal understanding (number before)

8                    6                    0                    7  
3                    4                    1                    2  
9                    5

8c Ordinal understanding (number before)

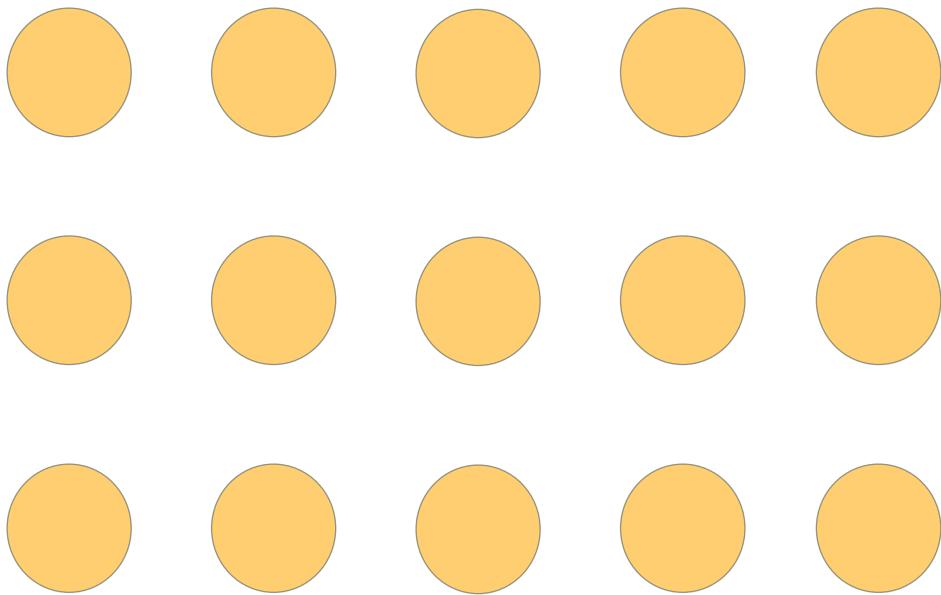

9	5	8	1	0	4
2	7	3	6		

8c Ordinal understanding (number before)

8	6	1	0	2	7
3	4	9	5		

9 Counting out – Version A

9 Counting out – Version B
